Canada's Inter-Professional Primary Care CME Conference and Exhibition

FAMILY PHYSICIANS \ PHARMACISTS \ NURSE PRACTITIONERS \ STUDENTS \ NURSES \ SPECIALISTS

Affordable registration fees:

EARLY BIRD PRICING
ONLY $110.00+HST
AFTER APRIL 17TH $175.00+HST

pri-med.ca/Canada

Register With Invitation Code DM1
### Thursday, May 9th

- **7:00am - 8:00am**
  - Additional Learning Sessions
- **7:30am - 8:30am**
  - Exhibit Hall & Registration Opens
- **8:30am - 9:30am**
  - **KEYNOTE I**
    - Puff a Day Keeps the Doctor Away?
    - Michael Verbora, MBA, MD, CCFP
- **9:30am - 10:15am**
  - Network/Visit Exhibits
- **10:15am - 11:15am**
  - Reconciliation without Action to End Poverty and Poor Health, is NOT Reconciliation
  - Chief Isadore Day
  - Rashes that Kill
  - George Porfinis, MD, CCFP(EM), FCPG
- **11:25am - 12:25pm**
  - A Practical Approach to Managing the Care of Older Patients in the Extremes of Complexity
  - Samir Sinha, MD, DPhil, FRCP, AGSF
  - Treating Poverty: A Practical Approach to Addressing Social Risks to Health
  - Gary Bloch, MD, CCFP, FCAP
- **12:40pm - 1:40pm**
  - Additional Learning Sessions/Restaurant/Visit Exhibits

### Friday, May 10th

- **7:00am - 8:00am**
  - Additional Learning Sessions
- **7:30am - 8:30am**
  - Exhibit Hall & Registration Opens
- **8:30am - 9:30am**
  - **KEYNOTE III**
    - Management of Aortic Valve Disease and Aortopathies: A Primer for Primary Care
    - Subodh Verma, MD, PhD, FRCSC, FAHA
- **9:30am - 10:15am**
  - Network/Visit Exhibits
- **10:15am - 11:15am**
  - Approach to Cancer-Related Anemias
  - Kevin Kuo, MD, MSc, FRCP
  - Using Antibiotics Wisely
  - Campaign: Antimicrobial Stewardship in Community Practice
  - Allan Gill, MD, CCFP(CE), MPH, FCAP, CCPRE
- **11:25am - 12:25pm**
  - Pediatric Rashes
  - Saul Greenberg, MD, FRCP
  - Vision and Learning: What this Means at the Primary Care Level
  - Rajvinder Pabla, OD, MSc
- **12:40pm - 1:40pm**
  - Additional Learning Sessions/Restaurant/Visit Exhibits

### Saturday, May 11th

- **7:00am - 8:00am**
  - Additional Learning Sessions
- **7:30am - 8:30am**
  - Exhibit Hall & Registration Opens
- **8:30am - 9:30am**
  - Aortic Aneurysm Management 2019
  - Douglas Wooster, MD FRCSC FACS FSVS RVT RPVI
  - Hand and Wrist Disorders
  - Olubukunola Ayeni, MD, MPH, FRCSC
- **9:30am - 10:00am**
  - Network/Visit Exhibits
- **10:00am - 11:00am**
  - Patients Centered Protocols in Rheumatic Diseases and Widespread Pain
  - Shikha Mittoo, MD MHS FRCPC
  - Updates in the Management of Osteoporosis
  - Sandra Kim, MD
- **11:00am - 11:30am**
  - Network/Visit Exhibits
- **11:30am - 12:30pm**
  - **KEYNOTE V**
    - Medical Breakthroughs - From Liquid Biopsies to Custom Immune Cells
    - Peter J. Lin, MD, CCFP
In a collaborative effort, Pri-Med Canada has partnered with the University of Toronto’s Department of Family & Community Medicine (DFCM) to deliver an impressive 3 full days of CME/CE education. Additional Mainpro+ Small Group Workshops, Industry Symposia and Pre-Conference sessions are also available to attendees, making PMC the largest annual inter-professional conference in Canada with a focus on primary care.

PLANNING COMMITTEE
JUNE 2018 - MAY 2019

Jeremy Rezmovitz, MSc, MD, CCFP
Family Physician, Sunnybrook Family Practice
Education and Innovation Lead, Quality and Innovation Program
Assistant Professor, Department of Family and Community Medicine, University of Toronto.

John Axler, MD, CCFP, FCFP
Department of Family & Community Medicine, University of Toronto

Zahra Bardai, BSc, MD, CCFP, MHSc, FCFP
Lecturer Department of Family and Community Medicine, University of Toronto, Community Family Physician

Luisa Barton, NP-PHC, BScN, MN, DNP
Faculty of Health Disciplines
Nurse Practitioner Program, Athabasca University

Irene Chen, MD
Resident Physician, Toronto Western Hospital

Dr. Art Kushner, MD, MCFP
Chief of Family and Community Medicine, Humber River Hospital
Lead Physician, Humber River Family Health Team
Lecturer, Department of Family and Community Medicine
Course Director, Pri-Med Canada Conference
University of Toronto

Debbie Kwan, BScPhm, MSc, FCSHP
Assistant Professor, Leslie Dan Faculty of Pharmacy and Department of Family & Community Medicine, University of Toronto
Pharmacotherapy Specialist, Family Health Centre, Toronto Western Hospital Park Hospital

Ivy Gandasah, MD
Director, Education, CFPC
Clinician-Educator/Researcher, Wilson Centre for Research in Education, University of Toronto
Associate Professor, Department of Family & Community Medicine, University of Toronto
Associate Professor, Dalla Lana School of Public Health, University of Toronto
Associate Member, School of Graduate Studies, University of Toronto
Associate Director, Academic Family Medicine, College of Family Physicians of Canada

The clinical update educational program is developed by the Pri-Med Canada Planning Committee, Department of Family & Community Medicine, Faculty of Medicine – University of Toronto, and is independent of any commercial influence. All decisions about the program content and faculty are made exclusively by the Planning Committee. No session in the Pri-Med Canada – University of Toronto program receives direct financial support from any pharmaceutical or other commercial company. Nor does any speaker receive such support for participation in this program.
Thursday, May 9th, 2019

8:30am - 9:30am

**KEYNOTE I**

**PUFF A DAY KEEPS THE DOCTOR AWAY?**

Michael Verbora, MBA, MD, CCFP

Review cannabis pharmacology, evidence, contraindication, potential benefits and harms. Address social benefits of cannabis legalization and regulation.

**RECONCILIATION WITHOUT ACTION TO END POVERTY AND POOR HEALTH, IS NOT RECONCILIATION**

Chief Isadore Day

As former Ontario Regional Chief and chair of the Assembly of First Nations national health portfolio, Isadore will bring into focus a diverse set of experiences from his 15-year political career, taking the audience along a journey with him on the critical issues facing Indigenous communities and Indigenous peoples across the country. Whether it is the issue of food security, mental health challenges, critical gaps in the level of care provided, or the diabetes and opioid epidemic that is facing our peoples, Isadore will bring into focus the problems we face and highlight the solutions we can implement together.

**RASHES THAT KILL**

George Porfiris, MD, CCFP(EM), FCFP

Rashes are commonly seen in primary care. Most of these are benign and can easily be treated by the primary care provider or can be referred to dermatology opinion. There are however a small percentage that can seriously harm or even kill the patient if not diagnosed in a timely manner. We will cover these conditions in an interactive case-based format.

11:25am - 12:25pm

**A PRACTICAL APPROACH TO MANAGING THE CARE OF OLDER PATIENTS IN THE EXTREMES OF COMPLEXITY**

Samir Sinha, MD, DPhil, FRCP, AGSF

Some older patients — often those with multiple chronic health conditions — will reach a pre-palliative point of care — where their care becomes extremely complex to manage and we are sometimes not sure how best to proceed in managing their care. In this presentation, we will present a practical way for the primary care provider to identify and prioritize the issues that can be addressed, and a practical approach that can help navigate the patient, family and practitioner out of the woods.

**TREATING POVERTY: A PRACTICAL APPROACH TO ADDRESSING SOCIAL RISKS TO HEALTH**

Gary Bloch, MD, CCFP, FCFP

The evidence linking adverse social conditions to poor health outcomes is irrefutable. But there is very little guidance for primary care providers to directly influence the social determinants of health. Luckily, this gap in knowledge and skills is now being filled. In this talk, Dr. Bloch will describe health provider interventions, with individual patients and providers, by health teams, in communities, and in society, that can directly impact social risks to health. Canadian primary care teams are at the forefront of this area of exploration, and this talk will offer unique insight into an area of inquiry and clinical innovation that is likely to transform the practice of front line health care.

3:35pm - 4:35pm

**ADOLESCENT SEXUAL HEALTH**

Aarti Kapoor, MD, CCFP, BSCH, BA

There have been many advances in the world of sexual health in the past year. Progress was made not only in terms of testing and treatment but also in regards to destigmatisation and inclusion. This lecture will aim to provide community practitioners with up-to-date information to meet the growing sexual health needs of their patients.

**METACOGNITION AND AVOID CLINICAL ERRORS IN MEDICAL DECISION-MAKING**

Vu Kiet Tran, MD, FCFP(EM), MHSc(Ed), MBA, CHE

As front line professionals, one of our most significant challenges is that of diagnosis and initial management. But many factors contribute to errors. Medical knowledge is not the primary cause of errors, but cognitive biases. How do they impact our thinking? That is the science of Metacognition. So, do you know what is unconscious bias? Can you change to improve your error rate? Come see and understand what has been plaguing you all this time.

Friday, May 10th, 2019

1:50pm - 2:50pm

**KEYNOTE II**

**DO NO HARM, HELP ME DIE: WHAT IF THERE IS NO GOLDILOCKS SOLUTION?**

Sonu Gaidn, MD, FRCP(C), FCFA, FAPA

We have now had nearly 3 years of experience since assisted dying legislation and policies were introduced in Canada. While opinions on Medical Assistance in Dying (MAiD) have changed over the years, controversy continues to surround the topic, with some arguing that elements of current policy are too restrictive, and others arguing against expansion of eligibility criteria. This session will review the Canadian experience and relevant international data, explore current controversies surrounding MAiD, and ask the tough question — if there is no “perfect solution”, which mistakes do we want to make?

**BURNOUT REVEALED! A SHARED PROBLEM IN HEALTHCARE**

Joy Albuquerque, MD, MA, FRCP(C)

Burnout is a serious issue in healthcare impacting all members of the healthcare team. This presentation will review the syndrome of burnout and research in the context of physician health. The impact of burnout on healthcare professionals correlates with personal and professional outcomes. Burnout is seen increasingly as a systems issue, a cultural issue associated with transformative changes in the delivery of health care, organizational strains and rising professional expectations. Yet there is reason to be optimistic for change, which include wellness programs and initiatives to address engagement and satisfaction of healthcare providers while improving the bottom line, patient care.

**A PRACTICAL APPROACH TO MANAGING THE CARE OF OLDER PATIENTS IN THE EXTREMES OF COMPLEXITY**

Jonathan Davine, MD, CCFP, FRCP(C)

Often, psychopharmacologic treatment of psychiatric conditions involves combining medications in an appropriate manner. In this workshop, we will discuss a number of scenarios where this occurs. Treating depression is very common in the primary care setting. We will discuss proper dosing of antidepressants, optimizing antidepressants, augmenting a partial response to antidepressants, dealing with treatment-resistant depressions, and dealing with insomnia in the depressed patient. We will also discuss when it is important not to combine certain psychiatric medications. We will also present data on the treatment of certain anxiety disorders, where combining psychiatric medication may also be part of the treatment plan.
8:30am - 9:30am

**KEYNOTE III**

**MANAGEMENT OF AORTIC VALVE DISEASE AND AORTOPATHIES: A PRIMER FOR PRIMARY CARE**

Subodh Verma, MD, PhD, FRCCP, FAHA

Diseases of the aortic valve and ascending aorta remain an important cause of morbidity and mortality, particularly among, the aging population. The purpose of this presentation is to provide a primer on the diagnosis, and management options for these two important diseases with a focus on newer approaches and clinical practice guidelines.

---

10:15am - 11:15am

**USING ANTIBIOTICS WISELY CAMPAIGN: ANTIMICROBIAL STEWARDSHIP IN COMMUNITY PRACTICE**

Allan Grill, MD, CCFP (COE), MPH, FCFP, CCEP

Choosing Wisely Canada (CWC) is a national organization to help clinicians and patients engage in conversations about reducing unnecessary tests and treatments to support effective care choices. Over the past two years, CWC has partnered with the College of Family Physicians of Canada to advance a campaign focusing on antibiotic overuse in primary care. Two major contributors include unnecessary antibiotic prescriptions for upper respiratory tract infections, as well as asymptomatic bacteriuria in long-term care. In partnership with the Public Health Agency of Canada, the ‘Using Antibiotics Wisely’ campaign was created to integrate evidence-based approaches into practice that support principles of antimicrobial stewardship to reduce antibiotic resistance and adverse events. This presentation will focus on the development and dissemination of practice statements and knowledge translation tools related to the above campaign to support continuing professional development for primary care providers. Resources to enhance patient education and engagement will also be shared.

---

11:25am - 12:25pm

**VISION AND LEARNING: WHAT THIS MEANS AT THE PRIMARY CARE LEVEL**

Rajvinder Pabla, OD, MSc

With 80 percent of learning being visual, this presentation will explain how comprehensive eye exams and vision screenings will be explored.

---

1:50pm - 2:50pm

**KEYNOTE IV**

**INTEGRATING PALLIATIVE CARE INTO FAMILY PRACTICE**

Sandy Buchman, MD CCFP (PC) FCFP

This keynote lecture will make the case that Family Physicians/Primary Care Providers should incorporate a palliative care approach into their practices. The argument will be made that not only should palliative care be fully integrated into a family practice, but FPs/PCPs need to take ownership of palliative care much like they did when they assumed ownership of diabetes care and chronic disease management. Palliative care is core to the practice of family medicine in 2019. When patients are living with life-limiting illness, they and their families want to receive this kind of care from their most trusted and intimate health care provider—their FP/PCPs. This is readily do-able and so important for patients and their loved ones. And the rewards that the FP/PCP who provides palliative care brings to the FP/PCP and their loved ones. And the rewards that the FP/PCP who provides palliative care brings to the practice of medicine.

---

3:35pm - 4:35pm

**PEDIATRIC RASHES**

Saul Greenberg, MD, FRCPC

Viral rashes in children take on many forms and can be difficult to diagnose. This program will help the physician diagnose these rashes based on morphology and clinical presentation. A brief description of the cause and treatment of these rashes will be presented. Both common and rare viral rashes will be discussed allowing family doctors to feel more confident in specifying the cause and treatment of the viral rashes they encounter.

---

4:45pm - 5:45pm

**HEPA: WHO NEEDS IT, HOW IS IT USED, AND HOW DO I PRESCRIBE IT**

Laura Cruz, MSc, MD, CCFC(SEM), Dip Sport Med

Non-communicable diseases can be prevented and managed by regular physical activity, particularly in those who are not meeting internationally recognized weekly physical activity recommendations. Primary care providers are optimally positioned to explore physical activity benefits and goals with patients. Interview skills already in use can be readily applied to the prescription of exercise. In this lecture, strategies that have been successful in Europe will be reviewed, in the context of applying them to the Canadian health care environment. Straightforward, practical tips that help patients adapt a healthier more active lifestyle will be reviewed and shared.

---

**PACEMAKER LIMBO: HOW LOW CAN YOU GO?**

Douglas Ng, MD, FRCCP (Cardiology)

Discussion on bradycardia, including management, classification, and diagnosis.
Saturday, May 11th, 2019

AORTIC ANEURYSM MANAGEMENT 2019
Douglas Wooster, MD FRCSC FACS FSVS RVT RPVI
This presentation will include a discussion of the importance and natural history of abdominal aortic aneurysms (AAA) and associated vascular pathology. AAA represent a significant population health issue and are treatable to avoid death from rupture. The new aneurysm screening guidelines (2018) from the CSVS and SVS will be presented and strategies for implementation identified. Previous studies have shown low uptake on AAA screening in Canada; a mini practice audit tool will be introduced to facilitate guideline implementation. The importance of genetic and family clusters of AAA will be noted. Appropriate assessment for diagnosis and surveillance will be discussed. Medical management, as well as, operative and endovascular intervention will be reviewed. Controversies in AAA management will be discussed. Future directions will be explored.

HAND AND WRIST DISORDERS
Olubukunola Ayeni, MD, MPH, FRCSC
Management of common hand and wrist injuries.

PATIENTS CENTERED PROTOCOLS IN RHEUMATIC DISEASES AND WIDESPREAD PAIN
Shikha Mittoo, MD MiHS FRCP
This lecture would be an introduction to different pain syndromes, Fibromyalgia (FM), and interplay with Systemic Conditions. Besides an explanation regarding the burden of pain in RA and OA, it also provides the differentiating clues between FM and Inflammatory Arthritis (RA, PsA, AS, Late-Onset RA syndrome of PMR, OA). Also an integrated framework and suggested treatment pathways for the identification of Inflammatory Arthritis would be introduced and for a better application of the presented framework different cases are going to be discussed.

UPDATES IN THE MANAGEMENT OF OSTEOPOROSIS
Sandra Kim, MD

11:30am to 12:30pm

KEYNOTE V
MEDICAL BREAKTHROUGHS - FROM LIQUID BIOPSIES TO CUSTOM IMMUNE CELLS
Peter Lin, MD, CCFP
A glimpse into the future of medicine. This lecture will discuss all the upcoming technologies and platforms that will change how we practice medicine. Things like liquid biopsies and custom made killer cells for cancer. Our practice of medicine will be very different so let's embrace it grow with it.

WHAT ATTENDEES ARE SAYING

“Speakers were personable professional and highly informed. It made the time away from clinic extremely worthwhile. Thank you! It has grown so much over the years, but I think you have done a good job growing with the increased interest. Lots of screens, audio is great. Topics are relevant. Keep up the great job!”

“I would strongly recommend to any healthcare professionals who are active in their practice to attend this dynamic and inspirational conference.”

“I had a very good experience at this conference. For the price, you get a lot out of it compared to many other conferences I have been to. You get to learn from the experts in their respective fields. Symposias were great. Food was great.”

“I enjoyed the opportunity to meet fellow professionals and discuss relevant topics.”
Thursday, May 9th, 2019

**MAINPRO+ WORKSHOPS**

10:00am - 12:00pm

**Price: $350 + HST**  
**Credits: 8 Mainpro+**

**PSBG ADHOC WORKSHOP: CARDDIOVASCULAR DISEASE: PRIMARY PREVENTION & PRESCRIBING PHYSICAL ACTIVITY: USING A VITAL SIGNS APPROACH**  
Deanna Telier, MD, MEd, CCFP, FCFP

**Learning Objectives**
- This module will enable clinicians to design cardiovascular risk for the purposes of primary prevention using a patient-centered, primary care-based approach; utilize strategies that promote and encourage lifestyle change for CVD risk reduction reflecting on available regional community resources; and discuss the benefits, risks and role of pharmacotherapy to reduce individual CVD risk while promoting informed patient decision-making.
- This module will enable clinicians to effectively engage in an assessment of patient physical activity levels; confidently apply a variety of strategies to raise awareness of and encourage an increase in physical activity in patients; and provide evidence-based recommendations for physical activity for patients both with and without specific medical conditions (examples featured in this module include osteoarthritis and coronary artery disease).

1:00pm - 4:00pm

**Price: $350 + HST**  
**Credits: 6 Mainpro+**

**INTERPERSONAL PSYCHOTHERAPY (IPT) FOR THE TREATMENT OF MAJOR DEPRESSIVE DISORDER**  
Michael Pare, B.SC. M.SC. M.ED. M.D; Howard Schneider, MD, MDPAC(C), CCFP; Joel Shapiro, MD, FRCP(C); James Whyte, B.SC.N., MD, CCFP; Chase Everett MCMURREN, BA, BED, MD, CCFP

**Learning Objectives**
- Describe the theoretical foundations of Interpersonal Psychotherapy (IPT).
- Describe the four foci of treatment in Interpersonal Psychotherapy for Depression (IPT).
- Describe the beginning, middle and ending treatment phases of IPT.

**Price: $495 + HST**  
**Credits: 9 Mainpro+**

**TEN-MINUTE CBT: A THREE-CREDIT-PER-HOUR WORKSHOP**  
Greg Dubord, MD

**Learning Objectives**
- Learn to break patients away from their “empathy addiction.”
- Learn to structure ten-minute appointments to maximize impact.
- Learn the vital importance of not working harder than most patients.

**Price: $300 + HST**  
**Credits: 6 Mainpro+**

**CASE-BASED INTERPERSONAL PSYCHOTHERAPY (IPT) FOR ADHD IN CHILDREN**  
Mary Manno, BScN, MD, CCFP, FCFP

**Learning Objectives**
- Learn to break patients away from their “empathy addiction.”
- Learn to structure ten-minute appointments to maximize impact.
- Learn the vital importance of not working harder than most patients.

Friday, May 10th, 2019

**MAINPRO+ WORKSHOPS**

9:00am - 12:00pm

**Price: $350 + HST**  
**Credits: 8 Mainpro+**

**PSBG ADHOC WORKSHOP: DEMENTIA: A STEPSWISE APPROACH TO INVESTIGATION AND PREVENTION & SYCONE IN ADULTS**  
Mary Manno, BScN, MD, CCFP

**Learning Objectives**
- This module will enable clinicians to develop a stepwise approach to assessment of memory concerns and dementia diagnosis; choose and utilize appropriate tools to assess for cognitive impairment; and discuss evidence for dementia prevention strategies with patients.
- This module will enable clinicians to identify syncope and differentiate benign from potentially life-threatening causes; appropriately investigate a patient presenting after syncope; and manage common causes of benign syncope.

9:00am - 12:00pm

**Price: $350 + HST**  
**Credits: 8 Mainpro+**

**PSBG ADHOC WORKSHOP: TREATMENT AND PREVENTION IN PRIMARY CARE & TRAVEL MEDICINE: PRE-TRAVEL CONSULTATION**  
James Faught, BSc, MSc, M.D, CCFP, FCFP

**Learning Objectives**
- This module will enable clinicians to appropriately screen patients for T2D; implement evidence-based treatment and prevention strategies; use appropriate metabolic targets and develop office-based strategies for effective ongoing monitoring; and counsel patients on self-management.
- This module will help clinicians to identify risk factors, developmental red flags and symptoms that may be early signs of ASD; use and interpret screening/case finding tools to identify children who may have ASD; provide guidance and resources to parents regarding effective management strategies for challenging behaviours while waiting for specialty referral, including dispelling myths; and counsel parents about the evidence for effective ASD treatment and prognosis.
- This module will enable clinicians to take a thorough medical travel history and identify high risk travellers who would benefit from more detailed travel medicine expertise, including consultation where available and accessible; provide education and preventive counselling, recommend vaccinations and prescribe prophylactic medications as appropriate for travellers; and provide preventive advice in specific populations such as those visiting friends and relatives in high risk areas, those engaging in high risk activities, and pregnant women.

1:00pm - 4:00pm

**Price: $300 + HST**  
**Credits: 6 Mainpro+**

**KEEPING GOOD PROFESSIONAL BOUNDARIES IN MEDICAL PRACTICE**  
Michael Pare, B.Sc. M.Sc. M.Ed. M.D; Gail Erlick Robinson, MD, FRCP (C)

**Learning Objectives**
- The different between Boundary Crossings and Boundary Violations.
- What do we mean by a “boundary” in a doctor-patient relationship?
- What is the therapeutic frame?
**PBGS ADHOC WORKSHOP: MANAGING MULTIMORBIDITY IN PRIMARY CARE & HAIR LOSS IN ADULTS**

Mary Manno, BScN, MD, CCFP

**Learning Objectives**
- This module will enable clinicians to engage in shared decision-making with patients with multimorbidity to define and develop specific approaches to meet their goals of care; balance multiple practice guidelines and best evidence with goals of care and clinical prognosis in order to enhance patient well-being and functional status; and organize community-based care (office, home) and systems to support patients with multimorbidity.
- This module will help clinicians to prioritize a differential diagnosis and perform an appropriate work-up for hair loss; provide evidence-based treatment options and information/support for patients who are concerned about hair loss; and initiate appropriate specialist referral.

**SPIROMETRY INTERPRETATION: THE CHALLENGE OF DISTINGUISHING BETWEEN ASTHMA AND COPD**

Anthony D’Urzo, MSc, BHPE, CCFP, FCFP

**Learning Objectives**
- Recognize the spirometric overlap between asthma and COPD.
- Correctly interpret spirometry cases applying a user-friendly spirometry interpretation guide.
- Understand the measurements of lung function and their application to spirometry interpretation.

* Schedule subject to change. For more information and details, please visit: pri-med.ca/CANADA

**DONWLOADABLE SLIDE DECKS**
View available presentations right on your mobile device. Or print from a computer.

**NETWORKING WITH ATTENDEES**
See if your friends or co-workers are attending the conference.

**LIVE POLLING**
Respond to polls during presentations right in the app.

**CUSTOMIZED AGENDA**
View session and speaker details. Then edit your own personal agenda with sessions you wish to attend.

**INTERACTIVE EXHIBITOR LISTINGS**
Browse the over 230 companies on our trade show floor and see exactly where their booth is located.

**AND MORE!**
Get notified when symposia registration opens, message attendee support, post to social media, view hotel and shuttle information, it’s all in the Pri-Med App.

DOWNLOAD THE APP TODAY!
Search “Pri-Med Events” in your app store or visit www.pri-med.ca/app in your browser.
**ADDITIONAL LEARNING OPPORTUNITIES**

**PRE-CONFERENCE SYMPOSIA**

8:00am - 5:00pm

**Price:** $55 + HST

Wednesday, May 8th, 2019
Includes a full day of CME, breakfast, networking breaks and lunch.

**INDUSTRY SPONSORED SYMPOSIA**

Thursday, Friday and Saturday
May 9-11, 2019

Additional CME during breakfast lunch and dinner breaks.

**Pre-Registration for Symposia Opens in Mid-March**

Questions?
registration@pri-med.ca

Register online at PRI-MED.CA/CANADA

* PRE-CONFERENCE AND SYMPOSIA ARE PRODUCED INDEPENDENT OF THE DFCM, UNIVERSITY OF TORONTO, PLANNING COMMITTEE AND ARE SUPPORTED BY EDUCATIONAL GRANTS FROM INDUSTRY.

---

**EXHIBIT HALL**

**Interactive display area**
Preview the latest array of family medicine products and services from over 230 exhibitors.

**Bookstore**
University of Toronto Bookstore is a leading publisher of health science books and journals, incorporating a family of outstanding imprints. Large selection of titles and great savings.

**Massage Area**
Melt the stress away with a relaxing complimentary neck and shoulder massage by a Certified Massage Therapist.

**Sponsored By:**

**HOTEL ACCOMMODATION**

Complimentary shuttles to and from the host hotels to Pri-Med Canada will be provided. We also offer complimentary parking lot shuttles that circulate throughout the lot.

**Westin Bristol Place**
950 Dixon Rd, Toronto, ON.
Rates From: $165 + HST
Call: 1-866-837-5184

- Complimentary Wi-Fi
- Discounted self-parking of $12/night
- Hotel Shuttle Service to and from airport

**Holiday Inn**
970 Dixon Rd, Toronto, ON.
Rates From: $165 + HST
Call: 416-674-4363
Ask for the Pri-Med Canada 2019 group rate. Group Code: PRI

- Complimentary Wi-Fi
- Discounted self-parking of $10/night
- Hotel Shuttle Service to and from airport

**Four Points by Sheraton**
6257 Airport Road, Mississauga, ON.
Rates From: $149 + HST
Call: 905-678-1400

- Complimentary Wi-Fi
- Discounted self-parking of $15/night
- Hotel Shuttle Service to and from airport
